

# MiTo Parts Catalogue User Guide

## Checking Compatibility

Many parts for the bodywork, structure and interior of the MiTo is the same for all engines and specifications, with variants based on certain models and whether they are left or right-hand drive, manual or automatic etc.

Whilst some catalogues (e.g. steering wheels, seats) will vary greatly based on the individual model specification, the majority of other parts are differentiated by the technical specification (engine, gearbox etc).

The catalogue on the right highlights the compatibility and legends with red circles. In this example (starter motor) the Legends at the bottom list codes such as S/S for Stop/Start, 1.4 for the petrol 1370cc, 1.6D for the 1598cc diesel along with codes PETROL and DIESEL for petrol and diesel.

In the Catalogue section at the top it determines *overall* compatibility of (in this case) the starter motor for 1.4 petrol and the 1.6 diesel by referencing "1.4+PETROL, 1.6D+DIESEL". Other codes such as 875CC, 1.3D are also common for TwinAir/1.3 models.

But the Parts List section then defines more *specific* compatibility (e.g. "1.4+S/S" for 1.4 petrol cars with stop/start, or "1.4+!S/S" for 1.4 petrol cars without stop/start).

An exclamation mark before a code always mean NOT.

In the image at the bottom of this page, you will see an example of a Parts List and a Legend which differentiate between engines.

Throughout the catalogues, you will find parts which look broadly the same but may be different between, say, a 1.4 78hp and a 1.4 170hp MiTo. But the Legend will always define the compatible codes for each variant.

Once you become familiar with the catalogues, you will start to know the codes for your

Catalogue	MITO 2013-2018	Catalogue
Category	15.1 ENGINE STARTING EQUIPMENT	
Var.	01 <b>1.4 + PETROL, 1.6D + DIESEL</b>	
Rev.	00	

Part compatibility (circled in red) is determined at the top (for the Variant group) and in the Parts List below for specific models using Legend codes which are always listed at the bottom.

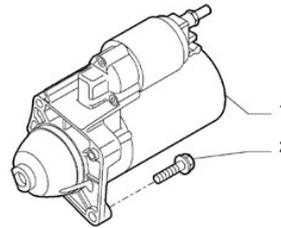

For example, in the top Catalogue section:

1.4 + PETROL = 1370cc AND Petrol  
1.6D + DIESEL = 1598cc AND Diesel

In the Parts List below:

1.4+S/S = 1370cc AND Stop/Start  
1.4+!S/S = 1370cc and NOT Stop/Start

An exclamation mark before a Legend code ALWAYS means NOT.

Right-hand drive cars have code RHD  
Left-hand drive cars have code LHD

2016-on facelift cars have code MY16

TCT versions have gearbox code TCT

	Part Num.	Description	Compatibility	Modif.	Qty	Notes	Col.	Reman.
	1	51804744	STARTER MOTOR	1.4+S/S	C17697	1		71793777
	1	51916168	STARTER MOTOR	1.4+S/S	D17697	1		71795387
	1	51890631	STARTER MOTOR	1.4+!S/S		1		
	1	51810308	STARTER MOTOR	1.6D+S/S		1		
	2	18753021	SCREW	1.4		2		
	2	16287521	SCREW	1.6D		3		

Legend	
S/S	STOP&START
1.4	HORSE POWER (MARKET):1370
1.6D	HORSE POWER (MARKET):1598
PETROL	FUEL:PETROL
DIESEL	FUEL:DIESEL
17697	New starter motor [DAT 11/07/2014]

specific MiTo (e.g. if you have a 170hp Cloverleaf, you will always look for compatibility with 1.4, 170HP etc).

## Important Differences

Some parts are differentiated between left and right-hand drive vehicles. Where the parts differ, the catalogues use the codes LHD and RHD. UK owners should always look for RHD.

Some technical parts may differentiate between gearboxes and use codes such as PCC510, PCC635 and others to show compatibility for the C510 gearbox, the C635 gearbox etc. TCT versions are always identified with the code TCT.

Facelift 2016-on MiTos are largely the same parts as pre-facelift MiTos, but exceptions (e.g. bumpers, interior) are identified with the code **MY16**.

Particularly complex are interi-

or trim parts, upholstery or parts which vary based on the model of MiTo (e.g. Distinctive, Progression, QV etc). There are dozens of codes (e.g. LLO, LL1) which distinguish trim levels, but also lots of codes (e.g. 6Q2, 6Q3) which differentiate items like different radio/Uconnect systems. Some compatibility lists many codes and many exceptions (using the exclamation mark to exclude certain variants) and can be very complex.

If you are unsure, contact your Alfa Romeo dealer or if you are a

member of the Alfa Romeo Owners Club then your MiTo Registrar can access the EPER system with your registration or VIN to identify specific parts with compatibility for your individual MiTo.

## Protection

All parts catalogues are securely protected, watermarked, tracked and are traceable. They are system generated from a database owned by the Alfa Romeo Owners Club.

Please do not copy or share, simply use the system.

	Part Num.	Description	Compatibility
